## 2009 F-150 2.5"

### 2009 FORD F-150 2/4WD 2-1/2" LEVELING KIT

#### FEATURE

- ▶ Top Spacer and Pre-load
- ▶ Ball Joint Protection
- ▶ 1" Rear Available

#### BENEFIT

The use of both a top spacer and pre-load spacer not only increases performance in cornering, but also offsets the increased tire weight to maintain a quality ride.

Unlike many leveling kits on the market, the use of a pre-load spacer eliminates the upper ball joint from maxing out when the suspension droops.

For those who like the truck to still set a little tail high, a 1" rear block kit is available.

#### 2009 FORD F-150 4WD
